EXPERIENCE

IT Mentor

Tashkent, Uzbekistan

[Muhammad al-Khwarizmi Successors Project](#)

Mar 2024 – Present

- Provided front-end mentorship to 25+ aspiring developers, enabling them to build responsive and interactive web applications. This included guiding one student to win the “Web Master Challenge” competition.
- Delivered hands-on training in HTML, CSS, JavaScript, and React.js, guiding students through 7+ real-world UI/UX-focused projects.
- Delivered foundational programming instruction in Python and C++ and guided students in solving over 150+ algorithm challenges, resulting in measurable improvements in logical thinking and coding proficiency.

Frontend Developer (Contract / Freelance)

Tashkent, Uzbekistan

[Alif Market Group](#) (Corporate Website)

Feb 2025 - May 2025

- Built 6 key standalone website pages and 15 subpages, accounting for 60% of the total project. Implemented responsive design for all devices, significantly enhancing usability and performance across the platform.
- Boosted application performance by implementing dynamic imports and separating server/client components in Next.js, improving loading speed by ~30% and making the codebase more modular and scalable.
- Reduced initial page load time by 60% - from 5s to 2s - by implementing a lazy-loaded video component, resulting in faster rendering and improved user experience.
- Enabled full right-to-left (RTL) layout support for Arabic-language pages, ensuring correct rendering and enhanced accessibility for RTL users across mobile, tablet, and desktop platforms.

Frontend Developer

Tashkent, Uzbekistan

[Botcommerce](#) LLC (Social Commerce Platform for SMEs)

May 2024 – Oct 2024

- Optimized and refactored platform middleware to improve performance, reliability, and maintainability.
- Redesigned 35% of the [e-commerce](#) and [Telegram Mini App](#) interface, focusing on key user flows and improving overall usability and visual consistency.

Frontend Developer

Tashkent, Uzbekistan

[Sugurta Bozor](#) (Online marketplace for insurance services)

Jan 2024 – May 2024

- Reached 100% SEO score in Lighthouse through proper implementation of metadata, robots.txt, sitemap, and Open Graph standards.
- Achieved 50% fewer redundant API calls through DRY-based code refactoring and request optimization.
- Built responsive UI based on Figma design, achieving ~100% design accuracy and consistent cross-device rendering.
- Introduced agent mode to the platform, leading to the onboarding of 3 active agents.
- Implemented spare parts functionality across Client, Admin, and Mobile apps, supporting unified access and management.

Frontend Developer

Tashkent, Uzbekistan

[Botcommerce](#) LLC (Social Commerce Platform for SMEs)

May 2023 – Jan 2024

- Improved UI/UX by resolving key interface issues and optimizing layout consistency across the platform.
 - Enabled 10% of shops to effortlessly import products and categories by integrating a new Express24 plugin into the platform.
 - Developed the QR Code Generator feature into the platform, enabling users to promote their online stores.
 - Added a notification system to boost store user interactions, with 40% of store owners adopting the feature.
 - Integrated CSV import functionality, enabling users to bulk upload product categories and items efficiently.
 - Implemented skeleton loaders across all pages to improve perceived performance and user feedback during load time.
-
